

IB Diploma Results Summary

Graduation Year	IB Diploma Candidates	IB Diplomas Awarded	Pass Rate	Mean Points
2023	24	24	100%	32.7
2022	18	17	94%	32.5
2021	13	13	100%	33.0
2020	18	18	100%	34.8
2019	20	20	100%	32.0
2018	20	20	100%	32.0
2017	5	5	100%	30.0
2016	9	9	100%	30.4
2015	10	10	100%	32.0
2014	11	10	91%	32.0
2013	6	5	83%	27.0
2012	7	7	100%	30.0

For privacy reasons, we do not provide individual student scores and even though we are extraordinarily proud of our higher scoring students, we do not provide our highest scores. The reason for this is that it would be relatively simple to identify individual graduates from the very small cohorts. Our duty to ensure the privacy of the individual outweighs the desire for public disclosure of this information.

	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013	2012	Combined Years

It is very pleasing that our students have been successful in the many years of the IB Diploma Programme at H.I.S. In most instances, individual students have achieved results that have exceeded both their expectations and those of their teachers. From the perspective of an international school, it is very satisfying to have a high ratio of the coveted bilingual diplomas awarded.

The majority of our graduates have continued onto further study in colleges and universities around the world. Last year's graduates are studying in the USA, the UK, Asia, and various European destinations, including the many world-class universities here in Heidelberg.

Graduates from previous years can be found studying in Oxford, Edinburgh, London, Bath, York, Swansea, Glasgow, Manchester and Southampton in the UK. Berkley, New York, Atlanta, Salt Lake City, Provo & West Lafayette in the USA, Vancouver & Halifax in Canada. Seoul in the Republic of Korea, Paris, Sofia, Budapest, Amsterdam & Leiden as well as more locally in Karlsruhe, Kaiserslautern and of course, here in Heidelberg at SRH and Universität Heidelberg.

Our past students are studying for a wide range of undergraduate and postgraduate degrees including: medicine, international law, chemistry, business management, IT & computer science, biosciences, nursing, education, art & design, sociology and environmental sciences. Some students from our first cohorts have already completed their degrees and have entered the workplace or pursuing higher education studying for Masters and Doctoral degrees.

¹ From such small cohorts one should be cautious when drawing conclusions or inferences as the data sets may be too small to be statistically reliable and may produce misleading information.
